## Frese HVAC Applications

Innovative solutions from Frese balance global HVAC systems accurately and efficiently. From cooling systems in the Middle East to heating systems in Scandinavia, our products transform state of the art technology into everyday solutions.

For over 25 years, Frese has specialised in the design and manufacture of dynamic, pressure independent flow solutions for heating and cooling applications in a wide variety of market sectors including commercial office developments, hotels, educational establishments, sports complexes and residential buildings.

To support our products, the knowledge, experience and dedication of our employees and partners ensure our solutions are applied correctly to maximise savings and position Frese as the authoritative voice for pressure independent and dynamic solutions.

## Frese HVAC applications

- Fan coil units
- Chilled beams
- Radiant panels
- Radiator circuits
- Heat interface units
- Primary chiller plant
- Primary boiler plant
- Plate heat exchangers
- Air handling units
- Heat pumps
- Chilled ceilings
- Trench heating
- Calorifiers
- Injection circuits
- Underfloor heating
- Secondary pumps
- Hot water recirculation
