

Hilton Copenhagen Airport Hotel

Copenhagen, Denmark

Project Overview and Details

The Hilton Copenhagen Airport, Denmark, is the perfect match for the new, ultra modern airport of Copenhagen. The hotel has the city's largest rooms featuring Scandinavian design furnishings and floor-to-ceiling windows allowing maximum daylight to flood each room. Meeting facilities for up to 450 people, restaurants, fitness centre, pool, sauna and steam bath, are some of the highlights of the hotel.

Task

"Well appointed guestrooms and impeccable service is something you can count on at Hilton". Perfect air-conditioning and heating in order to always have fully satisfied guests at checking-out. Unproblematic, noiseless and maintenance-free operation of the heating/cooling system.

Solution

Frese Automatic Balancing Valves were placed on each of the terminal units of the Hotel to ensure the hydraulic balance and the right temperature everywhere in the building.
