Frese INDUSTRIAL Applications

Frese Industrial HVAC Applications

For over 25 years, Frese has specialised in the design and manufacture of dynamic, pressure independent flow solutions for global heating and cooling applications.

As a leading manufacture, Frese has always explored new opportunities for the application of the core valve technology in market sectors other than commercial heating, ventilating and air conditioning.

Through our extensive product and application knowledge, the Frese range of dynamic balancing valves can now be used for a range of application in the Industrial HVAC market utilising our standard range of dynamic balancing valves in DZR and a range of special alloy dynamic balancing valves manufactured in AISI316L for arduous environments.
