

## Marmara Hotel

### Antalya, Tyrkiet

#### Frese EVA

- Max differential pressure: 400 kPa
- Operating temp.: 0 til 95°C
- Dimensions: DN15-DN25
- Flow rate: Up to 2448 l/h
- Material: DZR brass
- Static pressure: PN25
- For cooling and heating applications

#### Project Overview and Details

Located three kilometres from Antalya's historical centre, The Marmara Antalya is the world's first revolving hotel with a slowly revolving section providing different views throughout the day. The 15-floor hotel features 238 air-conditioned guestrooms decorated by the famed French designer Christian Allart in a bright contemporary style. Member of The Marmara Hotels with distinguished city and resort hotels in Turkey and the U.S., The Marmara Antalya is unique in its location for its quality service, creative gourmet dining, diverse entertainment and comforting style.

#### Task

Located three kilometres from Antalya's historical centre, The Marmara Antalya is the world's first revolving hotel with a slowly revolving section providing different views throughout the day.

#### Solution

Frese EVA Automatic Balancing & Control Valves were selected for the 750 FCUs to ensure hydraulic balance and desired temperature everywhere in the complex.
