

COWI

Head office, Kongens Lyngby, Denmark

Project Overview and Details

COWI is a leading international consulting group within engineering, environmental studies and economics. Since COWI was founded in 1930, the Group has been involved in more than 50,000 projects in 175 countries. With 3,300 employees, COWI is behind some of the largest infrastructure projects in the world. The Group head office is in Denmark, with subsidiaries and offices in 35 countries and additional project offices in all countries in which it operates.

Task

A perfect working environment for the staff of the head office. Unproblematic, noiseless and maintenance-free operation of the heating/cooling system. Convincing arguments regarding design, commissioning and operation to people who are behind some of the largest engineering projects in the world.

Solution

Frese Automatic Balancing Valves were selected to ensure the hydraulic balance of the piping and the right temperature everywhere in the building.
