

Ronesans Tower

Istanbul, Turkey

Project Overview and Details

This is a high rise Class A office project to be developed over a 13,810 sqm land in Kozyatağı/Ataşehir on the Asian side of Istanbul. The project is intended to be a landmark project that will change the silhouette of the Ataşehir region.

The project is strategically located at the junction of E-5 Highway and E-5/TEM connection road in Kozyatağı, a fast developing residential and office location on the Asian side of Istanbul. It has good visibility from the TEM connection road and is located next to the Marriot Asia Hotel, which is a significant landmark in the area. The surrounding area of the property includes high quality office buildings, shopping centres and high end residences.

Solution

Preferred Dynamic Balancing Valve solution for ongoing Ronesans Tower Office Project heating and cooling systems is 728 pcs of Frese Alpha, Optima and Optima Compact Series.
